

(A) **MECHANISM**

(B)

Information value of nested refinement

$$L^*(Z) - L^*(Z') = I(Y; Z' | Q, Z) > 0$$

A nested refinement adds target-relevant conditional information

(C)

Factorial identification

1.5B + K2

0.39

3B + K3

2.10

7B + K5

7.41

NLL gain; both model-by-state interactions > 0
